is looking for one

**« Safety & Quality Manager » (m/f)**

Reference EC694

**THE COMPANY**

Leader since more than 50 years, the company designs, produces and sells accessories that are used in concrete or masonry constructions.

- The products and solutions were developed by own teams and are well known in the construction sector. The company is mainly focused on the design, engineering, production and direct selling of its products.
- The company is part of an international Group and wishes to reinforce the Safety culture and the Quality system within several locations in Belgium and France.
- The company is looking for a Safety & Quality Manager. The position is based in Belgium, close to Brussels West (130 people),
- The Safety & Quality Manager will travel on a regular basis to French locations.
- The position is reporting to the Operations & Technical Director..

## **POSITION**

The Safety & Quality Manager leads the improvement and implementation of a genuine Safety and Quality culture across the Company. He drives the achievement of zero-accident work environment

- Supports the Management, Plant Managers and all other members of the hierarchical safety line as provided for in the official safety policies and regulatory rules
- Executes the tasks as provided for in official policies for prevention and protection at work. Ensure compliance with all regulatory bodies and standards
- Constantly evaluate, assess and alter safety procedures and policies for the benefit of employees and customers, in line with internal procedures
- Implement guidelines and processes across locations
- Perform safety audits in the various plants/warehouses, analyze accident reports and drive improvements.
- Ensure that all accident reports (including near-misses and safety observations) are recorded in a timely, complete, and accurate manner. And that safety and health hazards are corrected, eliminated or guarded
- Develop and implement training and other leading safety activities for workers and managers
- Instill a “safety is MY responsibility” culture across all workers and managers
- Analyze all quality and non-conformity reports and drive process improvements. Liaise with sales, procurement and production to ensure an effective resolution for our customers
- Improve and promote the internal quality system in order to prevent non-conformities and lead us to be the most reliable company in our market
- Responsible for the monthly reporting to the Company with regard to the established leading and lagging indicators (KPI's).

This function has a strong potential for growth.
