

Leader in radio communication solutions

is looking for a m/f

Software Engineer

Reference EC834

THE COMPANY

Our client is a best-in-class provider of innovative radio communication technology and solutions that aim to improve the critical communication in confined areas, such as road tunnels, railway tunnels, metros, offshore wind farm platforms, airports, etc. Our job is to design radio coverage systems that are easy to install and maintain at the best prices for both national public safety networks and PMR / DMR in major infrastructures.

Due to its actual growth, the company is actively searching for a Software Engineer.

THE POSITION

Your role will be:

- To design, develop, test and document a software making the bridge between industrial devices and higher level software
- To follow-up the development of components from the prototype to industrialization, considering other aspects than pure coding: analysis, deployment aspects on factory chain, documentation, R&D testing
- To provide support to factory team

You are reporting to the Head of Software and you are in close connection with RF engineers, Electronics Engineers and System architects.

PROFILE

- You have a Software Engineering background in Electronics or Computer Science (Engineer or Bachelor) with a strong experience.
- 2 to 7 years of experience
- A polyvalent developer, not to be afraid to jump from C++ to Javascript or TypeScript
- Linux app deployment & administration
- GIT source control
- Knowledge of Modbus and/or SNMP is a great asset.
- Experience with Angular is a great asset.
- HTTP REST communication
- Basics of electronics are an asset.
- Customization of Linux distribution is an asset.
- Experience with Node.js is an asset.
- C# is an asset.
- Mandatory: Being curious and not afraid of diving into opposite layers of a stack
- Structured in development (Open/close, Single responsibility principles)
- A good autonomy is a must, while remaining very communicative
- To be open to learn new development languages if needed in the future. No technical religion.
- To be organized, to be able to present a plan and provide regular reports of progress
- English written and spoken is a must.
- French written and spoken is a great asset.
- Other languages are an asset.

OFFER

- You will be part of an ambitious multi-national company with a high local added value.
- Possibilities to work on different projects in the future
- A full-time permanent contract
- Your salary will be in line with your skills and experience. It includes additional extra-legal benefits.

APPLY

If you match the profile and if you are motivated to successfully meet this challenge, please send your resume and cover letter to: eric.croisy@adva-consult.com
