**a SAP consultancy company**

**Recruits...!**

## **THE COMPANY**

**Infinite Solutions** is a consultancy company that offers its expertise in different technical and functional domains of SAP. Originally positioned as a strong player in the Enterprise Portal domain, **Infinite Solutions** quickly broadened its competences to the complete SAP NetWeaver Technology Platform. Today their team consists mainly in 3 units which are "Analytics" with BW and BO, "Basis" (BC Design and Operations, DB, SAP Security, SAP Archiving, New SAP Technologies like HANA, Solution Manager, LVM, etc) and "Development & Integration" (ABAP Development, Portal, PI, SOA, .NET and JAVA).

**Infinite Solutions** is a SAP NetWeaver Solution Partner, an important appreciation for a young, dynamic and quickly growing company.

Next to the high quality of their services, **Infinite Solutions** attach special importance to the relationship with their customers and partners. They strongly believe that trust and honesty are the basis of a long term relationship.

**Vision: Optimise processes and performance through the use of technologies.**

**Infinite Solutions** takes their responsibilities as consultants very seriously and they will recommend only those solutions that will show a proven ROI, based on their clients' technical and business orientation, and technical maturity. All this will be performed in close collaboration with their clients' teams, respecting their clients' development and maintenance guidelines and adapting at each step to their clients' own plans.

**Infinite Solutions** is not afraid to declare themselves a technology-oriented company, because they believe that technology is the main key to achieve the next round in cost reduction, performance and process optimisation.
